SUBASH SEKAR

Python Full Stack Developer | Django, FastAPI | REST APIs | AI/LLM | Immediate Joiner

+91 8438420257 | subashsekar116@gmail.com | Chennai, India

PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience in building scalable web applications using Django, FastAPI, and modern frontend technologies. Strong expertise in backend development, REST API design, Microservices architecture, and database-driven applications. Experience working with frontend technologies (HTML, CSS, JavaScript) to develop responsive and user-friendly interfaces. Skilled in integrating AI/LLM capabilities (OpenAI, Gemini, Claude, Llama) into full stack applications using RAG pipelines and intelligent APIs. Proficient in end-to-end application development, including authentication (JWT/OAuth2), system design, caching, and deployment using Docker.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java
Frontend Development: HTML5, CSS3, JavaScript, Basic UI Development, Responsive Design
Backend Development: Django, Django REST Framework (DRF), FastAPI, REST APIs, Microservices
AI / LLM Integration: OpenAI, Gemini, Claude, Llama, RAG, LlamaIndex, Qdrant, Prompt Engineering
Databases: PostgreSQL, MySQL, MongoDB, Supabase
Tools & DevOps: Docker, Docker Compose, Git, GitHub, Postman
Performance & System Design: Redis, Celery, Caching, Task Queues, API Gateway, Load Balancing
Testing: PyTest, Unit Testing

EDUCATION

MBA – Management Information Systems & Marketing
SRM Institute of Science and Technology, Trichy 2022 – 2024

PROFESSIONAL EXPERIENCE

Python Full Stack Developer
Conin Technologies Pvt Ltd, Hyderabad, India | January 2024 – Present

- Developed end-to-end full stack applications using Django and FastAPI, delivering scalable and maintainable web solutions.
- Built and consumed RESTful APIs for seamless frontend-backend integration.
- Designed backend Microservices for healthcare automation and integrated them with frontend workflows.
- Developed user-facing modules with HTML, CSS, and JavaScript for dashboards and data interaction.
- Integrated AI-powered features using OpenAI, Gemini, Claude, and Llama APIs into web applications.
- Implemented RAG pipelines for intelligent search and document retrieval features.
- Built asynchronous processing systems using Celery and Redis for background tasks.
- Implemented secure authentication using JWT, OAuth2, and RBAC.

PROJECTS

Care AI – Full Stack Healthcare Intelligence Platform

Tech Stack: FastAPI, Django, HTML, CSS, JavaScript, LlamaIndex, Qdrant, OpenAI, Gemini, Claude, Redis, Celery, Supabase, Docker

- Designed and developed a **full stack healthcare platform** using Microservices architecture for handling patient data, AI processing, and workflow automation.
- Built scalable **RESTful APIs using FastAPI** and integrated them with frontend modules for seamless data flow and user interaction.
- Developed **dynamic frontend dashboards** using HTML, CSS, and JavaScript to visualize patient insights and AI-generated outputs.
- Implemented **Retrieval-Augmented Generation (RAG)** pipelines using **LlamaIndex and Qdrant Vector DB** to enable accurate clinical document search and contextual responses.
- Integrated multiple **LLM providers (OpenAI, Gemini, Claude, and Llama)** to support intelligent query handling, summarization, and decision-making workflows.
- Developed an **asynchronous embedding service** using **Celery and Redis**, enabling large-scale vector generation and background processing.
- Implemented **DSPy-based structured reasoning pipelines** to improve response consistency and reliability of AI outputs.
- Designed and implemented **secure authentication and authorization** using JWT, OAuth2, and RBAC mechanisms.
- Built **AI Agents using LangChain**, enabling multi-step reasoning, tool calling, and automated clinical workflows such as triage and document routing.
- Integrated **Supabase for secure storage**, real-time data handling, and document management.

CRM – Full Stack Lead Management System

Tech Stack: Django, Django REST Framework, HTML, CSS, JavaScript, PostgreSQL, Docker

- Developed a **full stack CRM application** to manage the complete lead lifecycle including creation, assignment, tracking, and reporting.
- Built backend services using **Django and DRF**, exposing REST APIs for frontend integration and third-party services.
- Designed and implemented **interactive UI components** using HTML, CSS, and JavaScript for better user experience and data handling.
- Implemented **role-based access control (RBAC)** to ensure secure and restricted access to sensitive business data.
- Developed **authentication and authorization workflows** using secure session management and token-based mechanisms.
- Optimized **database schema and queries in PostgreSQL**, improving performance and reducing API response time.
- Implemented **robust error handling and validation mechanisms** to ensure application stability and reliability.
- Followed **Django MVT architecture** to maintain modular, scalable, and clean code structure.
- Containerized the application using **Docker**, enabling easy deployment and environment consistency.
